Starting soon

GUC IIIT Bhopal

Welcomes You to
Our Intro Session

Gnu/Linux Users Club

IIIT Bhopal

What is GUC?

A club where all
Linux enthusiasts
come together to
provide support and
education.

Introducing the Team

Faculty Mentor

Mr. Yatendra Sahu

Introducing the Team

Club Secretaries

Umang Bhalla

Shubham Vyas

Kushagra Kaushal

Tanav Singh Bajaj

Gaurav Gupta

Core Team

Sarthak Batham

Prem Karira

Narun Yadav

Kartik Pant

Our 6 months plan

- Init Session (Intro)
- Ways of linux installation (WSL/VM/Dual Boot)
- Filesystems and system services/ Automation
- Ricing + Contest
- Cyber Security
- Bash Scripting
- DevOps and CI/CD

OUR OBJECTIVES

1. To make people aware of the profits of Linux as an operating system
2. To guide people in path of DevOps
3. To help set-up development environments on Linux
4. To troubleshoot common problems faced by new Linux users

OUR OBJECTIVES

5. To organise webinars and provide platforms to discuss ideas related to this topic
6. To get people aware about GNU, free software foundation (FOSS) and open-source.
7. To help students use GitHub at an industry level.
8. To learn and get people aware of software licencing.

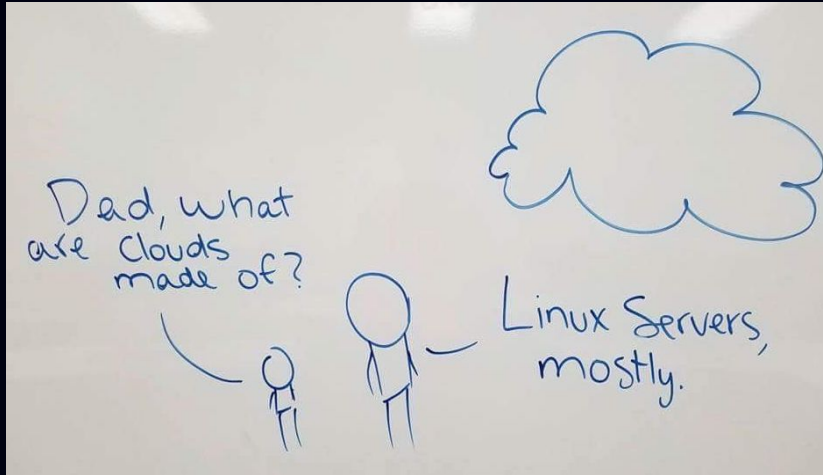

What is Linux?

Linux is an Unix-like operating system based on Linux Kernel. The software part of Linux OS is called GNU.

GNU : - GNU's not Unix

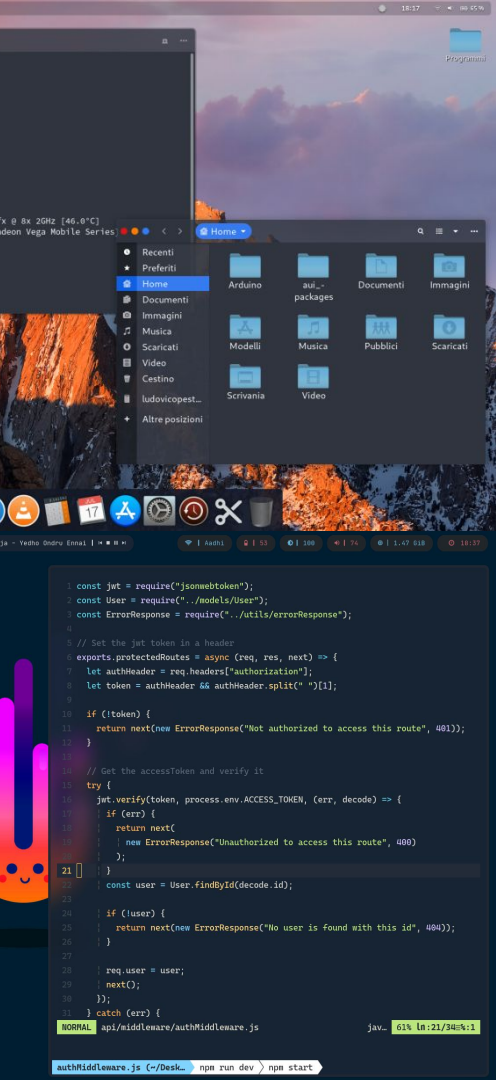

GNU is a collection of free softwares.

Where you will find Linux : -

1. Cloud Platforms
2. Android
3. Smart TVs and devices
4. Tesla Cars
5. Sophia Humanoid Robot
6. NASA Perseverance Mars Rover

Preferred OS data among Devs

OS Market Share

	Platform 	<input checked="" type="checkbox"/> Share 
<input type="checkbox"/>	Windows	87.56%
<input type="checkbox"/>	Mac OS	9.54%
<input type="checkbox"/>	Linux	2.35%
<input type="checkbox"/>	Chrome OS	0.41%
<input type="checkbox"/>	Unknown	0.13%
<input type="checkbox"/>	BSD	0.01%

What is Version Control System?

Version control refers to the practice of tracking and managing changes to software code, and Version Control Systems refers to software tools that assist software teams in managing changes to source code over time.

What is git and github?

Git

is a distributed version control system that lets you manage and keep track of your source code history,

Github

is a cloud-based hosting service that lets you manage Git repositories

What is OpenSource?

The term open source refers to something people can modify and share because its design is publicly accessible.

Open source software is software with source code that anyone can inspect, modify, and enhance.

Why Opensource?

Community

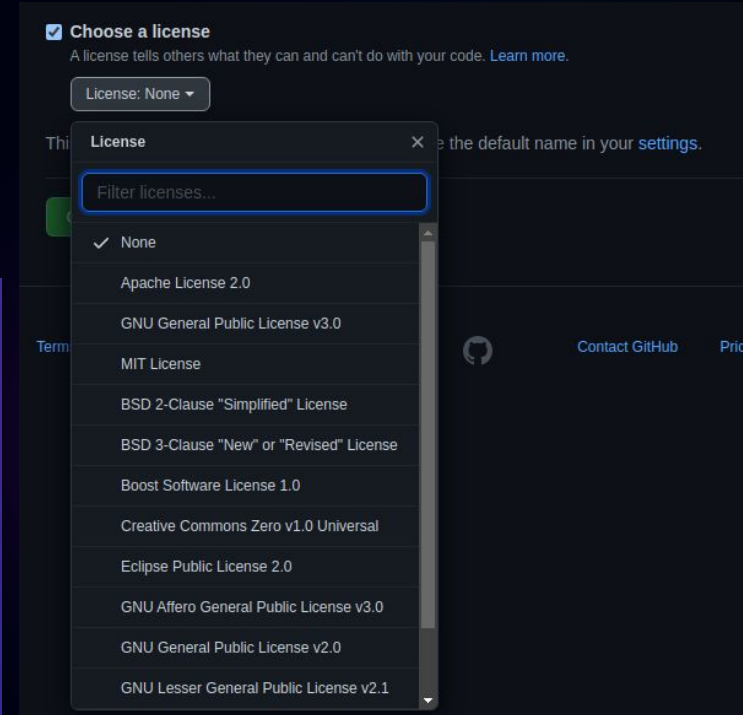

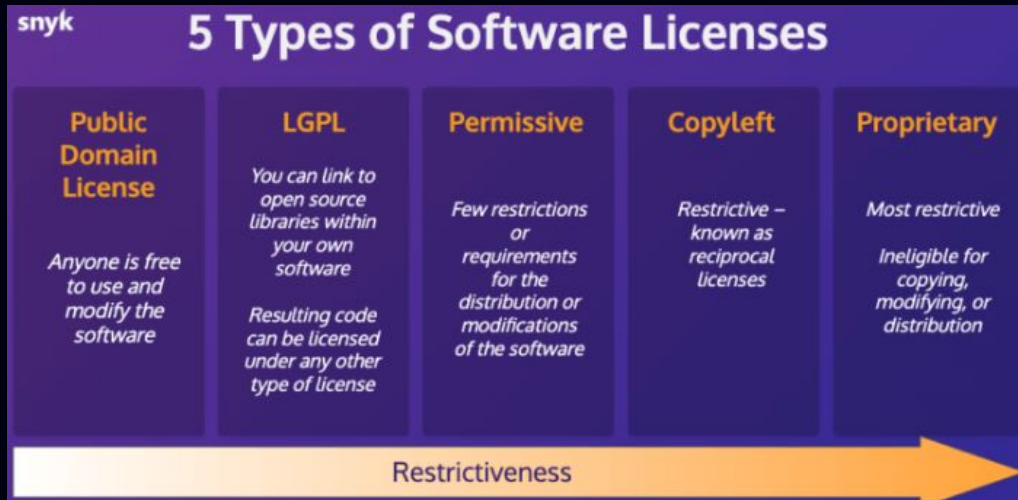

Control

Security

Software Licensing

The license is a text document designed to protect the intellectual property of the software developer and to limit any claims against them that may arise from its use.

Software Licensing

Trivia -

Apple's famous Mac OS used to actually be an open source OS, FreeBSD, which Apple modified and then made it closed source because BSD license allows it

DevOps

- What is DevOps? “DevOps is an approach to bridge the gap between agile software development and operations”
 - Promotes collaborative Mindset between Devs and Ops
 - It's what Agile is to software development
-
- Automation
 - Metrics
 - Sharing

Automation

What can be automated?

- Builds
- Deployments
- Testings
- Monitoring
- System rollouts &
System configuration

DevOps

Tools we will explore

- Github Actions
- Netlify , Vercel and Surge.sh
- Heroku
- Docker
- K3s and K8s
- Ansible
- All major build system based on GNU make for C/CPP/Rust.
- CI services like CircleCI , Jenkins and Gitlab

Projects and Tech

- Django + mongodb
- Discord bots in js and python
- Front end projects with React and Svelte
- Gitbook databases
- Docker and Kubernetes projects
- Our own Linux Distribution based on Arch Linux
- Http server in Rust with REST endpoints
- Small projects on distributed systems
- Bash Scripting

Shell-Scripts

What is The SHELL

The shell is a Computer program that takes commands from the keyboard and gives them to the operating system to perform

What is Shell-Scripting

Shell Scripting is a to write a file with series of commands for the shell to execute
